Resources online

You will be using these resources in the exercises when it says to generate a list of something..

Subjects / Items

For nouns of any quantity - https://randomwordgenerator.com/ set to noun.
For a random word set test: https://memoryleague.com/#!/train-words

People

For names of any quantity - https://randomwordgenerator.com/name.php
For a random name set test: https://memoryleague.com/#!/train-international
For an imaginary character - https://www.character-generator.org.uk/quick/
For an imaginary detailed person: https://artofmemory.com/tools/people/
For a real person's face: https://www.shutterstock.com/search/person+close+up

Actions

For verbs of any quantity: https://randomwordgenerator.com/ set to verb.

Terrains

For a real location: https://www.mapcrunch.com/
For a real building: https://www.bestrandoms.com/random-buildings
For a real room: https://www.shutterstock.com/search/room+interior?exclude_keywords=person and a page position up to 100 and page number up to 41,000.

Numbers

For a random number – https://www.google.com/search?q=random+number
For random number of any quantity and type: https://randomwordgenerator.com/number.php
For a random number set test - https://memoryleague.com/#!/train-numbers

Images

For an image - https://www.generatormix.com/random-image-generator
For a random image set test: https://memoryleague.com/#!/train-images

Mixed data types

For nouns, verbs, adjectives, and adverbs: https://randomwordgenerator.com/
For letters, digits, and special characters - https://randomwordgenerator.com/password.php

Tools

For a metronome - https://www.google.com/search?q=metronome

Substitute words 1

Visualizing words

Words must be able to be represented by something to be seen in the mind's eye. Descriptive words create a scene that can be visualized and remembered easily. Conceptual words work better when they are seen through the eyes of an event. The best words represent real events in our familiar set of memories with an abundance of detail. The best type of conversion that we can make, supported by psychology, is one with a related meaning and then if that is not easily done, we pick one with a related sound to the way the word is pronounced.

Words as related meaning images

Words can be related to their meaning in several different ways. It doesn't matter which one is used but you might find yourself preferring one over another. Think through the list and see if you can start seeing other ways to relate to your keywords.

Contiguity - Things that occur close to each other in time or space or are said in a phrase. This is the best choice. Thunder and lightning. Washing and drying. Salt and pepper. Jack and Jill.

Meaningful extension - Many images use the same word to name an associated part that depends on the item. This is a type of contiguity. Butter and butter dish. Bird and bird bath. Golf, golf balls, golf shoes, golf carts, and golf clubs. Fly and flyswatter.

Similarity - One has a trait like the other and would be in the same category. Coffee and tea. George and Martha. Trees and bushes. Sheep and cattle.

Contrast - Opposites. Hot and cold. Washington and Florida. Black and white. Light and dark.

Words as related sound images

Here's another list to think through. It's your fallback list that will always work because you don't have to think much. It's more like a learned game to play with words.

Meaningless extension – Using the word as a base for a new word without changing the sounds. This the best choice. Ray and rabies. Bay and baseball. Tea and tee-shirt.

Rhyme – Adding or subtracting a consonant sound of a syllable at first but keeping the vowel. Using the remaining sounds is helpful again. Pay and pray. Click it and ticket. Gain, grain, and crane.

Alliteration – Keeping the consonant sounds of a syllable at first but switching the vowel. Using the remaining sounds is helpful. Common in a group of number keywords by consonant like the Major system. Rubies and rabies. Ruby and robbery. Tomb, tome, and time.

Syllable reuse – Using the word as a part of another word and possibly making other subtle changes. A stressed syllable is best. **Cuck**oo and **cuck**old. E**lab**oration and **lab**oratory. Impedi**ment** and **ment**al health (weak) or im**pedi**ment and **pedi**cure (better).

Exercises

TEN EASY WORDS

Skill: Substitute words
Difficulty: Low

Go through each word and make sure you see how the related meaning is created from an understanding of the item, and where the related sound is just using the sound to find a similar word without any relevant

meaning. Come up with another visual word by meaning and sound for each word. The list starts at zero for use in later lessons.

Substitute words table

#	Item	Related meaning words		Related sound words	
0	saw	lumber		sausage	
1	tie	white shirt		tile floor	
2	knee	ripped jeans		Neanderthal	
3	ammo	revolver		Amazon	
4	arrow	bow		Errol Flynn	
5	law	judge		lawnmower	
6	shoe	sock		shooting range	
7	key	lock		key lime	
8	ivy	Ivy League school		ivory tusk	
9	pie	ice cream		python	

RANDOM WORD MEANINGS AND SOUNDS

Skill: Substitute words
Difficulty: Low

Generate a list of 10 random nouns from a generator in the **Resources Online**, and fill out the following table as in the previous exercise.

Substitute words table

#	Item	Related meaning words	Related sound words

WORD CONVERSION TENNIS, BY MEANING

Skill: Substitute words
Difficulty: Medium
Type: Group game

With one other person, or on teams of equal numbers, a word is selected at random to begin the round. A tennis referee should be appointed, or an agreement should be made to stop the round when one word is obviously not a proper play. The tennis referee should write down all the words that have been said. The round ends when a person repeats a word used previously or can't come up with a word.

In this game the words that follow each other must be **related by meaning**. So, the following would be a proper round: angry – Hulk – **green** – lichens – pond – catfish – fish fry – tartar sauce – mayonnaise – egg salad – romaine lettuce salad – **green**.

A winning score is eleven.

For fun, watch the Key and Peele dialog that loses the original keyword in a sequence of meaningful relationships: How Not to Remember Where You Parked Your Car
https://www.youtube.com/watch?v=m0FMk2zUHA0&t=0s

Advanced game – use a metronome set to beat every second to help count time limits for the next word. The round ends when the player fails to come up with a word by the number of metronome beats within five seconds. A referee can also beat out seconds and call the round as ended after **five** seconds.

WORD CONVERSION TENNIS, BY SOUND

Skill: Substitute words
Difficulty: Medium
Type: Group game

With one other person, or on teams of equal numbers, a word is selected at random to begin the round. A tennis referee should be appointed, or an agreement should be made to stop the round when one word is obviously not a proper play. The tennis referee should write down all the words that have been said. The round ends when a person repeats a word used previously or can't come up with a word.

In this game the words that follow each other must be **related by sound**. So, the following would be a proper round: **angry** – hang five – hanging file – Hannibal – ant pile – animal – enamel – minimal – mini-me – enemy – anime – Aunty Mae – **angry**.

A winning score is eleven.

Advanced game – use a metronome set to beat every second to help count time limits for the next word. The round ends when the player fails to come up with a word by number of metronome beats within ten seconds. A referee can also beat out seconds and call the round as ended after **ten** seconds.
